DISCUSSION OF FUTURE FOUNDATION STUDIES

Doug Head, representing Viatical and Life Settlement Association of America (VLSAA),
told Board members that there had been a terrific response to the market conduct initiatives and
suggested that data garnered as a result of this effort should be provided to NCOIL. He
suggested a study of how market conduct data could be used by state legislatures.

Sen. Steven Geller noted that the quality of ILF studies have enhanced the reputation of
NCOIL. He inquired whether there were other studies that might be undertaken in the future
such as medical malpractice or CLUE reports.

Rep. Keenan suggested a study on prescription drug pricing with possible Robert Wood
Johnson Foundation funding. Sen. Geller suggested that a study on drug importation or direct-
to-consumer advertising might be more appropriate. He indicated that the Board would explore
the subject of drug advertising in general.

Rep. Eiland suggested consideration of a study of non-traditional underwriting tools such
as credit scoring and CLUE reports. Sen. Geller asked that a report on the feasibility of such a
study be presented at the next NCOIL meeting in March 2005. Rep. Eiland then suggested a
study on the future role of traditional insurance agents in light of the Internet and other changes
in the insurance market.

Sen. Steven Geller (FL) raised the subject of whether additional ILF study would be
needed on terrorism insurance and/or insurance coverage of natural disasters. He directed staff
to identify five or six issues that could be discussed at the next ILF meeting in Savannah, GA.
