# Drug Formulary Model Law

Brian Allen, VP of Government Affairs

Mitchell

# Results of Formularies

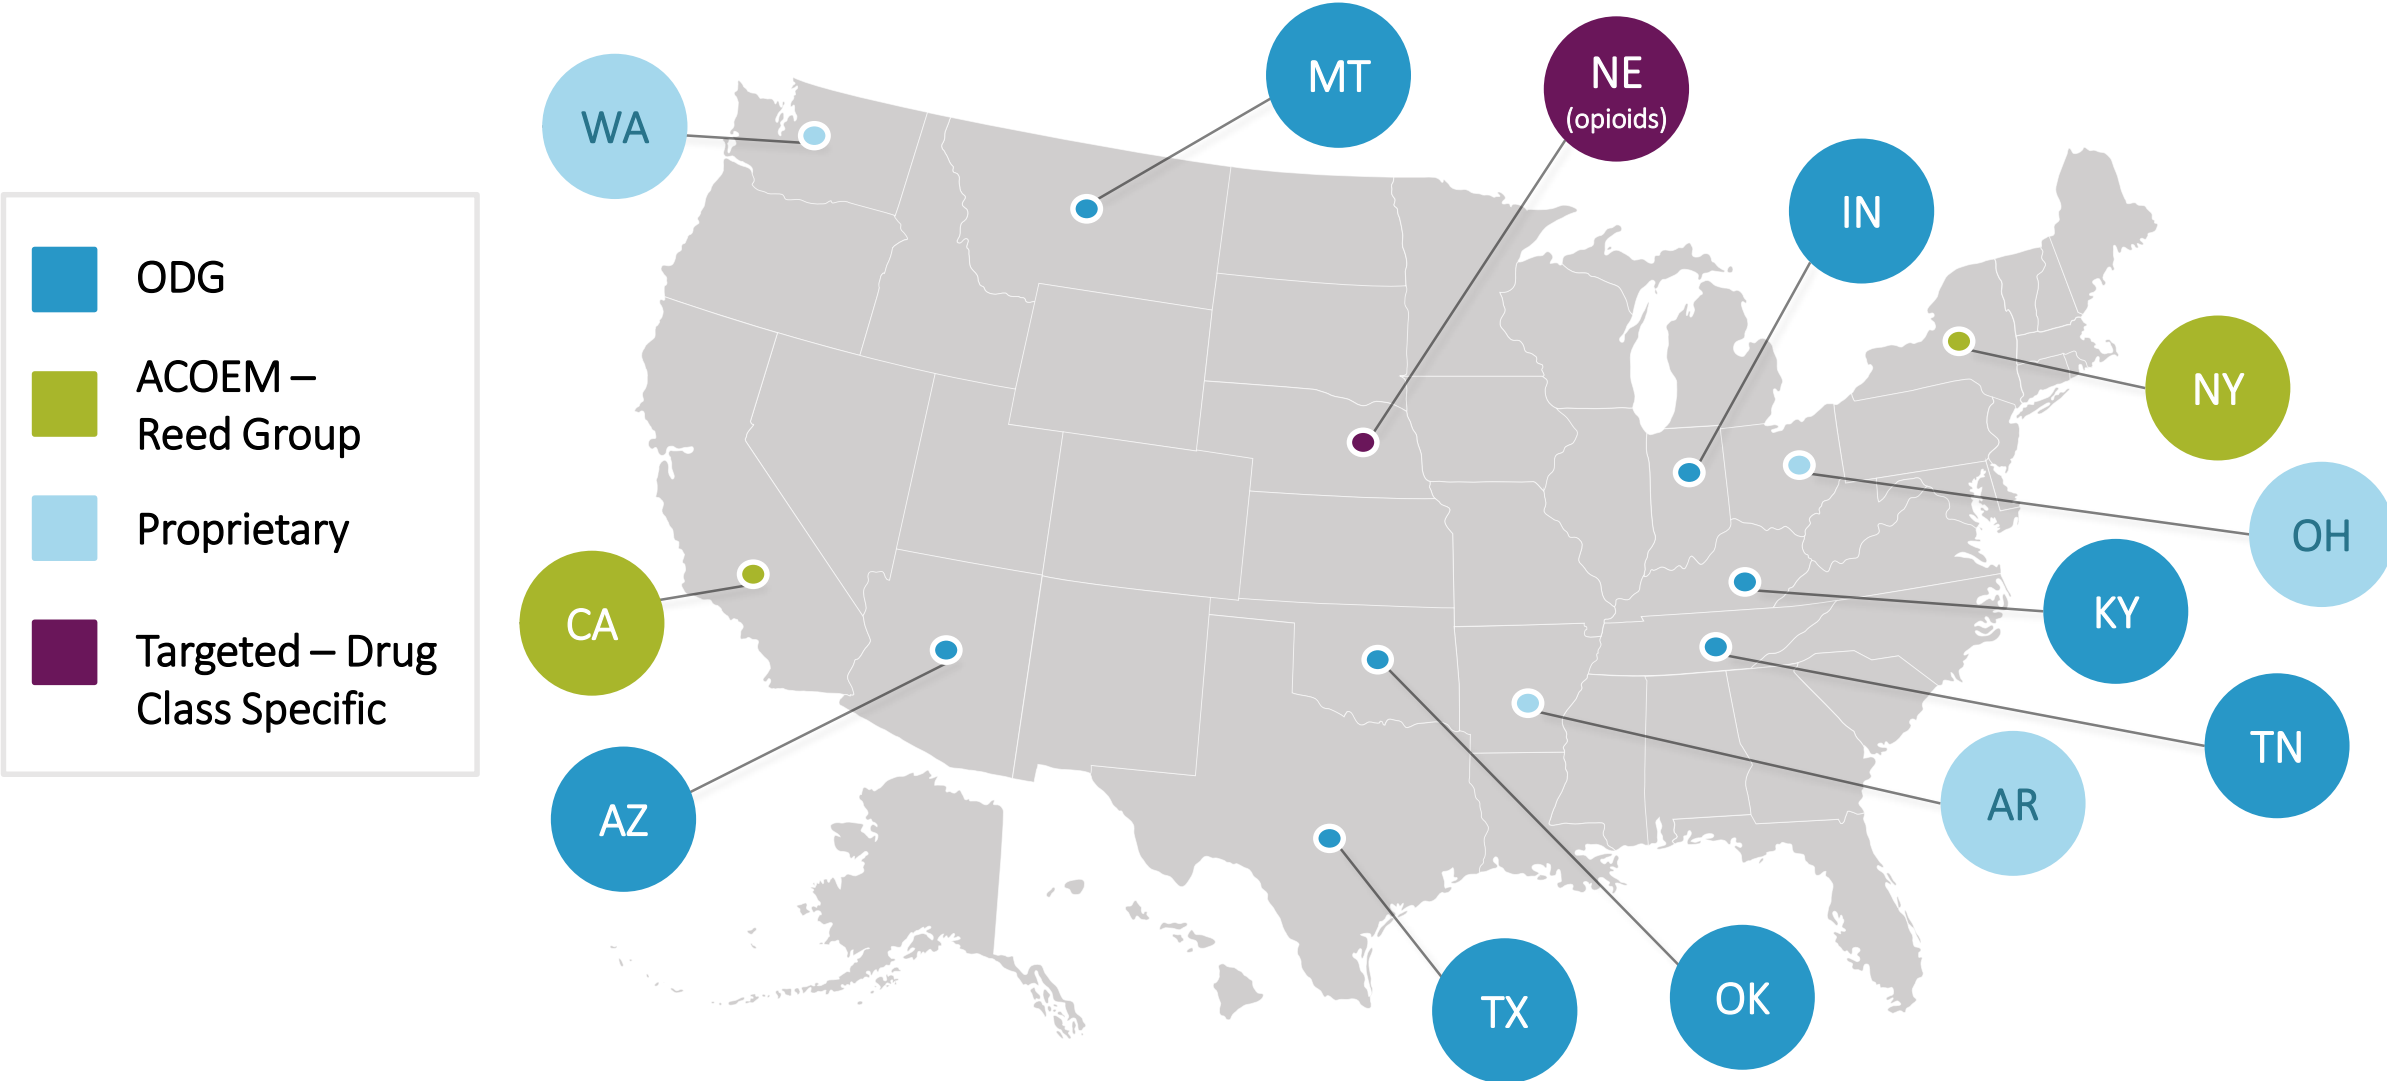

- 2011-2014: number of injured workers receiving “N” drugs **fell by 83%**
- “N” drug prescriptions fell by 85%
- Other drug prescriptions fell 14%
- Number of claims receiving “N” drug opioids with 90+ MME/day decreased from nearly 15,000 in 2009 to **less than 500 in 2015**

- Proprietary Formulary
- Number of injured workers meeting or exceeding threshold for being clinically dependent on opioids **decreased 59% since 2011**

# Types of Formularies

# Formulary Key Policy Ingredients

- Evidence-Based, Proven
- Focused on Care Outcomes
  - If you provide the most appropriate care, the costs will take care of themselves
- Control Cost-Driving Outliers
  - Physician dispensing
  - Compounded medications
  - Brand drugs with generic equivalents
- Ease of Use
  - Accessible to providers and users at little or no cost
  - Simplified utilization review
