Section 1. Title.

This act shall be known as and may be cited as the Telemedicine Authorization and Reimbursement Act.

Section 2. Purpose

The Legislature hereby finds and declares that:

(A) The advancements and continued development of medical and communications technology have had a profound impact on the practice of medicine and offer opportunities for improving the delivery and accessibility of health care, particularly in the area of telemedicine.

(B) Geography, weather, availability of specialists, transportation, and other factors can create barriers to accessing appropriate health care, including behavioral health care, and

one way to provide, ensure, or enhance access to care given these barriers is through the appropriate use of technology to allow health care consumers access to qualified health care providers.

(C) There is a need in this state to embrace efforts that will encourage health insurers and health care providers to support the use of telemedicine and that will also encourage all state agencies to evaluate and amend their policies and rules to remove any regulatory barriers prohibiting the use of telemedicine services.

(D) The need to access health care services is compounded by the challenges associated with COVID-19, as consumers are experiencing the negative effects the pandemic has on physical, mental, and emotional health that will extend into future years.

(E) Access to telemedicine is vital to ensuring the continuity of physical, mental, and behavioral health care for consumers during the COVID-19 pandemic and responding to any future outbreaks of the virus.

Section 3. Definitions

(A) “Telemedicine” means the delivery of clinical health care services by means of real time audio only telephonic conversation, two-way electronic audio visual communications, including the application of secure video conferencing or store and forward technology to provide or support healthcare delivery, which facilitate the assessment, diagnosis, consultation, treatment, education, care management and self-management of a patient’s health care while such patient is at an originating site and the health care provider is at a distant site; consistent with applicable federal law and regulations; unless the term is otherwise defined by law with respect to the provision in which it is used.

(B) “Telehealth” means delivering health care services by means of information and communications technologies consisting of telephones, remote patient monitoring devices or other electronic means which facilitate the assessment, diagnosis, consultation, treatment, education, care management and self-management of a patient’s health care while such patient is at the originating site and the health care provider is at the distant site; consistent with applicable federal law and regulations; unless the term is otherwise defined by law with respect to the provision in which it is used.

(C) “Store and forward” transfer means the transmission of a patient’s medical information from an originating site to the provider at the distant site without the patient being present.

(D) “Distant site” means a site at which a health care provider is located while providing health care services by means of telemedicine or telehealth; unless the term is otherwise defined with respect to the provision in which it is used.

(E) “Originating site” means a site at which a patient is located at the time health care services are provided to him or her by means of telemedicine or telehealth, unless the term is otherwise defined with respect to the provision in which it is used; provided, however, notwithstanding any other provision of law, insurers and providers may agree to alternative siting arrangements deemed appropriate by the parties.

Section 4. Coverage of Telemedicine Services

(A) Each insurer proposing to issue individual or group accident and sickness insurance policies providing hospital, medical and surgical, or major medical coverage on an expense-incurred basis; each corporation providing individual or group accident and sickness subscription contracts; and each health maintenance organization providing a health care plan for health care services shall provide coverage for the cost of such health care services provided through telemedicine services, as provided in this section.

(B) An insurer, corporation, or health maintenance organization shall not exclude a service for coverage solely because the service is provided through telemedicine services and is not provided through in-person consultation or contact between a health care provider and a patient for services appropriately provided through telemedicine services.

(C) An insurer, corporation, or health maintenance organization shall not require a covered person to have a previously established patient-provider relationship with a specific provider in order for the covered person to receive health care services provided through telemedicine services; however, the establishment of a patient-provider relationship shall not occur via an audio-only telephonic conversation..

(D) An insurer, corporation, or health maintenance organization shall reimburse the treating provider or the consulting provider for the diagnosis, consultation, or treatment of the insured delivered through telemedicine services on the same basis that the insurer, corporation, or health maintenance organization is responsible for coverage for the provision of the same service through in-person consultation or contact.

(E) An insurer, corporation, or health maintenance organization may offer a health plan containing a deductible, copayment, or coinsurance requirement for a health care service provided through telemedicine services; however, such deductible, copayment, or coinsurance shall be combined with the deductible, copayment, or coinsurance applicable to the same services provided through in-person diagnosis, consultation, or treatment.

(F) No insurer, corporation, or health maintenance organization shall impose any annual or lifetime dollar maximum on coverage for telemedicine services other than an annual or lifetime dollar maximum that applies in the aggregate to all items and services covered under the policy, or impose upon any person receiving benefits pursuant to this section any copayment, coinsurance, or deductible amounts, or any policy year, calendar year, lifetime, or other durational benefit limitation or maximum for benefits or services, that is

not equally imposed upon all terms and services covered under the policy, contract, or plan.

(G) The requirements of this section shall apply to all insurance policies, contracts, and plans delivered, issued for delivery, reissued, or extended in [State] on and after January 1, 20__, or at any time thereafter when any term of the policy, contract, or plan is changed or any premium adjustment is made.

(H) This section shall not apply to short-term travel, accident-only, limited or specified disease, or individual conversion policies or contracts, nor to policies or contracts designed for issuance to persons eligible for coverage under Title XVIII of the Social Security Act, known as Medicare, or any other similar coverage under state or federal governmental plans.

(I) Nothing shall preclude the insurer, corporation, or health maintenance organization from undertaking utilization review to determine the appropriateness of telemedicine services, provided that such appropriateness is made in the same manner as those determinations are made for the treatment of any other illness, condition, or disorder covered by such policy, contract, or plan. Any such utilization review shall not require prior authorization of emergent telemedicine services.

Section 5. Limited Telemedicine License

An applicant who has an unrestricted license in good standing in another state and maintains an unencumbered certification in a recognized specialty area; or is eligible for such certification and indicates a residence and a practice outside [State] but proposes to practice telemedicine only across state lines on patients within the physical boundaries of [State], shall be issued a license limited to telemedicine by the [State] Medical Board. The holder of such limited license shall be subject to the disciplinary jurisdiction of the [State] Medical board in the same manner as if (s)he held a full license to practice medicine.

Section 6. Network Adequacy and Limitation

(a) An insurer shall not solely use telemedicine or telehealth to satisfy network adequacy requirements with regard to a health care service.

(b) An insurer shall not limit coverage only to services delivered by select third party telemedicine or telehealth organizations.

Section 7. Rules

The [chief State insurance regulator and the chief medical licensing regulator] may adopt rules regulating that are consistent with this Act.

Section 8. Effective Date

This Act shall become effective immediately upon being enacted into law.

Section 9. Severability

If any provision of this Act is held by a court to be invalid, such invalidity shall not affect the remaining provisions of this Act, and to this end the provisions of this Act are hereby declared severable.
