# Summary of Redetermination Data (March-December 2023)

---

CMS has released [data](#) on outcomes for the 56.1 million renewals processed since the beginning of redeterminations (through December 2023)

## Coverage Renewed

**53% (29.8 million) have been successfully reenrolled in Medicaid and CHIP**

- 64% (19.1 million) of the successful renewals were completed through an *ex parte* process

## Coverage Terminated

**24% (13.7 million) have lost their Medicaid or CHIP coverage**

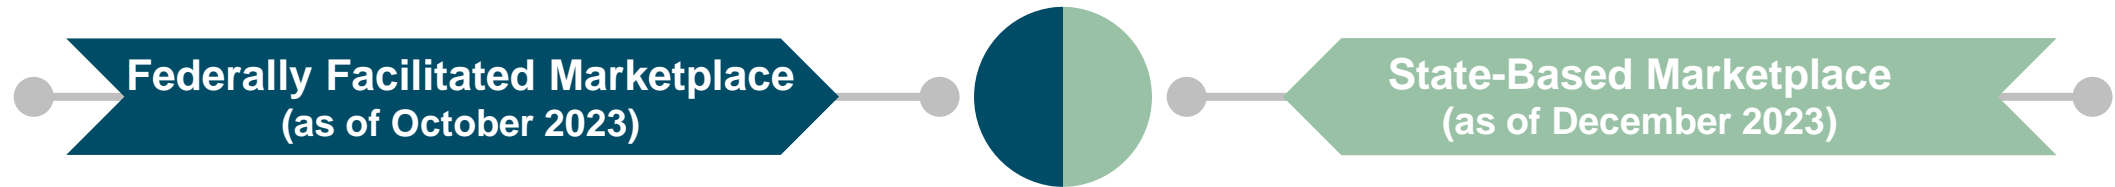

- 71% (9.7 million) of the terminations have been for procedural reasons
- States may have reinstated coverage for some of these individuals, but CMS does not capture that data from states

## Pending Renewals

**22% (12.6 million) of renewals are pending in states**

- States may have completed some of the pending renewals after each reporting month for which they submit data to CMS; however, the data published by CMS does not reflect those renewals
- This number likely is an overcount of the actual pending renewals

# Summary of Overall Marketplace Transitions Data

Nearly **4 million** individuals who have lost Medicaid or CHIP coverage have ended up at the FFM and **35% (1.4 million) of these individuals have applied for Marketplace coverage**

**91%** (1.26 million) of those who applied for coverage were **eligible for a Qualified Health Plan (QHP)** & **86%** of this cohort were **eligible for Advance Premium Tax Credits (APTCs)**

**1 million** consumers who were found eligible (79%) **selected a QHP**

Over **4 million** individuals disenrolled from Medicaid were **processed by SBMs**

**55%** (2.2 million) were determined **QHP eligible** & **61%** (1.3 million) of this cohort was **eligible for APTCs**

Nearly **half a million** consumers found eligible (22%) **selected a QHP**

# Recent CMS Redetermination Guidance

---

- Extension of unwinding [special enrollment period](#) (SEP)
- [Guidance on unwinding processes](#) and [tools for states](#) reinforcing important federal renewal requirements that states must follow, developed in response to questions from both states and partners;
- [Guidance to Medicaid managed care plans](#) on completing signatures for enrollees so plans can help more people renew coverage
- [New resources for partners](#) to help families navigate their state Medicaid fair-hearing process, such as if someone was determined no longer eligible for Medicaid.
- [CMS information bulletin](#) focused on ensuring eligible children maintain Medicaid/CHIP coverage

# Thank You
